

Mini_Howto Install chatGPT into Windows PowerShell 2024

Installation of Python3_12

```
PS mkdir 'C:\Program Files\Python3_12\'
```

```
PS cd 'C:\Program Files\Python3_12\'
```

```
PS curl https://www.python.org/ftp/python/3.12.6/python-3.12.6-amd64.exe -o  
python-3.12.6-amd64.exe
```

```
PS .\python-3.12.6-amd64.exe
```

Check Python pip version

```
PS python --version
```

```
PS pip --version
```

Create directory for virtualenv

```
PS mkdir 'C:\Users\your_user\chatGPT\'
```

```
PS cd 'C:\Users\your_user\chatGPT\'
```

Create virtualenv for ChatGPT client

```
PS python -m venv 'C:\Users\your_user\chatGPT\'
```

ChatGPT virtualenv must be populate like this :

```
PS ls 'C:\Users\your_user\chatGPT\'
```

```
Mode LastWriteTime Length Name
```

```
d----- 09/09/2024 22:32 Include
```

```
d----- 09/09/2024 22:32 Lib
```

```
d----- 09/09/2024 22:33 Scripts
```

```
-a----- 09/09/2024 22:32 262 pyvenv.cfg
```

After creating OPENAI_API_KEY on <https://platform.openai.com/>, define them like this :

```
PS [System.Environment]::SetEnvironmentVariable('OPENAI_API_KEY', 'your_api_key',  
[System.EnvironmentVariableTarget]::User)
```

Define PATH for Python312 Scripts (recommanded) :

```
PS $env:Path += ";C:\Users\your_user\AppData\Roaming\Python\Python312\Scripts\"
```

Autorize Shell execution locally

```
PS Powershell -ExecutionPolicy UnRestricted -command  
"C:\Users\your_user\chatGPT\Scripts\Activate.ps1"
```

```
PS Powershell -ExecutionPolicy UnRestricted -command  
"C:\Users\your_user\chatGPT\Scripts\deactivate.bat"
```

Or Autorize Shell execution globally if not working (Be Careful !)

```
PS Set-ExecutionPolicy Unrestricted
```

Install ShellGPT client :

```
PS pip.exe install shell-gpt
```

Loading chatGPT into terminal :

```
PS C:\Users\your_user\chatGPT\Scripts\Activate.ps1
```

Close chatGPT session like this :

```
PS C:\Users\your_user\chatGPT\Scripts\deactivate.bat
```

For Shell dialog with GPT OpenAI

```
PS sgpt.exe "Write Hello World in bash"
```

Enjoy !
